

## Preventive medications list

In addition to supporting a healthy lifestyle, preventive medications can help people avoid many illnesses and conditions. HDHP options that include preventive medications can help achieve the goal of ongoing good health. For ConocoPhillips participants who enroll in the HDHP option, coverage is provided for certain preventive prescription drugs (treating, for example, high cholesterol, hypertension, and other ailments). Coverage is provided at 100 percent, up to \$1,500 per person per year. A more extensive list of the preventive prescription drugs will be available at [hr.conocophillips.com](http://hr.conocophillips.com) under the HDHP Web page for current employees. If you have any questions regarding this benefit, you may also contact Medco Member Services at 1 800 770-2810 or go online to [www.medco.com](http://www.medco.com).

This list provides examples of the HDHP medical option's preventive medications by drug category. This is not an all-inclusive list. Medications may be added to or removed from the list depending on different factors, including the intended purpose(s) of the medication and medication availability.

Please call Medco to confirm that your medication is on the preventive medication list.

**Medications on this list that are not covered under your plan are not eligible for the preventive medication program.**

*This list includes medications always used for prevention and sometimes for treatment.*
